## Can Genetics Change How We View Race?

Dr. Benn Torres discusses her experience as a genetic anthropologist and how science can upend the narrative.

[Watch and read more here.](#)

## Evolution & Religion - Are We Asking the Wrong Questions?

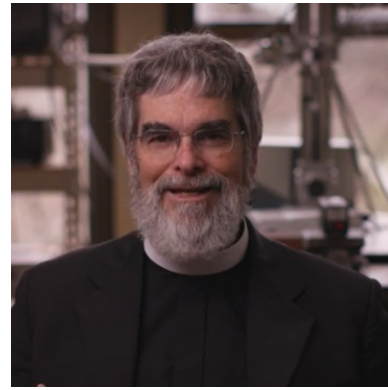

Dr. Carroll discusses his experience as a biologist and the importance of asking questions.

[Watch and read more here.](#)

## Should Religion Have a Place in Conversations About Science?

Br. Guy J. Consolmagno discusses his experience with science and as the Director of the Vatican Observatory.

[Watch and read more here.](#)

## Humility—Can it Exist in Science?

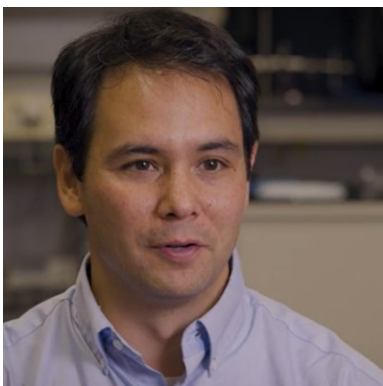

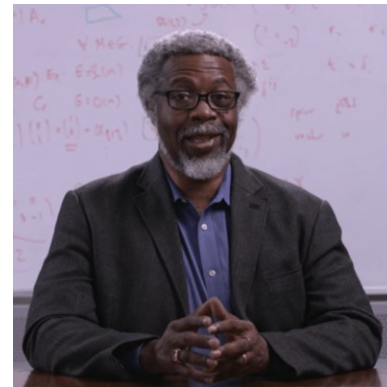

Dr. Fuentes discusses his experience as an anthropologist and primatologist.

[Watch and read more here.](#)

## Can You Solve Physics Problems With Your Dreams?

Dr. Gates discusses his experience as a theoretical physicist and the way “the answer appeared in a dream.”

[Watch and read more here.](#)

## Why Do We Get Hung Up on the Word 'Theory' of Darwin's Theory?

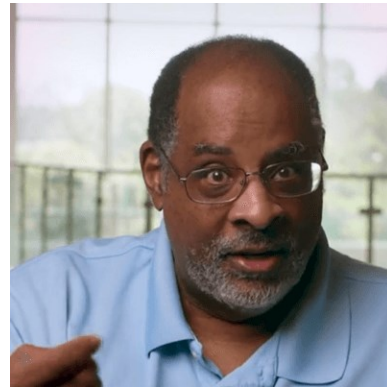

Dr. Go discusses his experience as an engineer and the importance of science communication.

[Watch and read more here.](#)

## Racism - Can We Use Science to Fight It?

Dr. Graves discusses his experience as a biologist and institutional racism within the scientific community.

[Watch and read more here.](#)

## Prayer and Pain - A 1500 Year-Old Mystery

Dr. Sheridan discusses her experience as a biological anthropologist and the questions that arose after finding the Monastic Collection in Jerusalem.

[Watch and read more here.](#)

## Science Can Answer the How, Can Religion Answer the Why?

Dr. Wiseman discusses her experience as an astronomer and the way "astronomy begs questions that it can't answer."

[Watch and read more here.](#)

## How to Have Hope When Solving a Scientific Mystery

Dr. Zoghbi discusses her experience as a neuroscientist and studying Rett Syndrome.

**“Science is at its best when many voices are heard,  
when many experiences inform, and when many  
people are curious.”**
